## تمديد ترخيص صناعي

التاريخ : ٢٠١٩ / ١٢ / ٢ م

رقم الترخيص: ٢٠١٥ / ٢٧٢

اسم المنشأة / المشروع: مصنع سمارت هاوس للمباني مسبقة التجهيز.

النشاط: ٢٥١١٣٠

السلام عليكم ورحمة الله وبركاته،

بالإشارة إلى كتابكم المقدم لإدارة التنمية الصناعية بخصوص رغبتكم في تمديد صلاحية الترخيص الصناعي، والمخصص له قسيمة أرض الصناعات الصغيرة والمتوسطة قسيمة رقم (٩١٢٠).

يسرنا إفادتكم بالموافقة على تمديد المدة الزمنية الممنوحة لكم وذلك لمدة ستة أشهر ابتداءً من تاريخ (٢٠١٩/١٢/٥ م) إلى (٢٠٢٠/٦/٤ م).

وتفضلوا بقبول فائق الاحترام والتقدير،

مدير إدارة التنمية الصناعية

Dream Kitchen

Perfetto Cleaning &  
Hospitality

Perfetto Marble  
& Granite

*Over the space of more than 18,000 sq. m, the first steps towards achieving our dream has been started allowing us to have big dream to establish such willing company “**Smart House**” with major 3 production lines as following:*

**Pre Fabricated Buildings**  
**Pre Engineered Steel Structures**  
**Light Gauge Steel**  
**Sandwich Panels**

# Pre-Engineered Buildings - Steel Structure

---

*Pre Engineered steel structures are medium to large size steel buildings consisting of primary and secondary steel structural frames resting on civil foundations and provided with suitable roofing, side cladding and water down take arrangements.*

*Pre Engineered buildings (PEB) are factory built buildings of steel that are shifted to site and bolted together. PEB process is in house design, fabrication at factory , delivery to site and assembling using best suited inventory of raw materials.*

*Pre-engineered buildings are commonly used in the construction of factories, logistic centers, steel mills, warehouses, workshops, distribution centers, sports stadiums, sheds, multi storey and high rise buildings, shipyards etc.*

**LEGEND :**

- 1. Wall Panel
- 2. Roof Panel
- 3 .Ventilator
- 4. Insulation
- 5. Roof Monitor

- 6. Sky Light
- 7. Crane System
- 8. Gutter & Downspout
- 9. Ridge Ventilator
- 10. Roof Extension

- 11. Personnel Door
- 12. Canopy & Facia
- 13. Sliding Door
- 14. Brick Wall
- 15. Purlin & Sagrod

- 16. Girt & Bracing
- 17. Rigid Frame
- 18. Louver
- 19. Rolling Door
- 20. Stairs

- 21. Wind Column
- 22. Window
- 23. Double Personnel Door

# Applications

# Pre-Fabricated Buildings

---

*Pre fabricated buildings are self contained buildings manufactured and fitted out in the factory. They are delivered by road, ready for rapid installation at site.*

*Pre-fabricated buildings (generally termed as porta cabins) are widely used in the construction of small buildings such as office facilities, guard and security house, site facilities, mosque and Mallis, changing room, laboratories, private villas, kitchen and mess hall, toilet and ablution units and multistory and large buildings such as labor camps and staff accommodation.*

## ELEVATION

# Applications

# Light Gauge Steel

## ADVANTAGES OF LIGHT GAUGE STEEL CONSTRUCTION

*Light gauge steel structures have many of the advantages :*

*They are light, and allow quick building without heavy tools or equipment. Every component can easily be carried by hand - a house is like a carpentry job on a larger scale. The main tool is a light, handheld screw gun. Since steel is strong, LGS structures are lighter than wood framed structures of equivalent strength.*

*Their higher strength allows greater spacing between members when compared to wood frame construction: about 24" (600mm) for LGS vs. about 16" or 20" (400 or 500mm) for wood. Fewer members translates to quicker construction times.*

*It is able to shape itself to any form, and can be clad and insulated with a wide range of materials.*

*It is easy to change or modify this construction at any point in its lifespan*
